```

```
Gest Fit:

After sorting block sizes:
Block 0: 180
Block 1: 280
Block 2: 380
Block 2: 380
Block 3: 560
Block 4: 680

Process 0 of size 212 is allocated in block 2 of size 380
Process 1 of size 417 is allocated in block 3 of size 580
Process 2 of size 112 is allocated in block 1 of size 280
Process 3 of size 426 is allocated in block 4 of size 680
Enter your choice: 3

Worst Fit:
After sorting block sizes:
Block 0: 680
Block 1: 580
Block 2: 380
Block 3: 280
Block 4: 180

Process 0 of size 212 is allocated in block 0 of size 680
Process 1 of size 417 is allocated in block 1 of size 580
Process 2 of size 112 is allocated in block 2 of size 380
Process 3 of size 426 is not allocated
```

```
Process 8 of size 712 is allocated in block 8 of size 648 Process 2 of size 412 is allocated in block 1 of size 548 Process 2 of size 112 is allocated in block 2 of size 340 Process 3 of size 426 is not allocated
```

```
Enter the number of processes: 4

Inter the number of memory blocks: 5

Inter the size of each process:

Process 8: 212

Process 3: 417

Process 3: 415

Inter the size of each memory block:

Block 4: 580

Block 1: 580

Block 1: 580

Block 4: 680

I. First Fit 2. Best Fit 3. Warst Fit

Enter your choice: 1

First Fit:

Process 8 of size 212 is allocated in block 1 of size 580

Process 1 of size 417 is allocated in block 2 of size 580

Process 2 of size 112 is allocated in block 2 of size 580

Process 3 of size 415 is not allocated
```

```
Process 8 of size 20 is allocated to sizes 1 of size 200
Process 1 of size 40 is allocated in sizes 4 of size 200
Process 2 of size 301 is allocated to sizes 2 of size 200
Secret 3 of size 400 is not allocated
```
